Product details

DISCHER MASTER

The interior design range

Appliances from the DISCHER MASTER range combine intuitive operation, reliable hygiene standards and smart technology that forms part of a comprehensive room solution for daily care. Washbasins, cabinets and accessories can be freely combined to create a functional workstation that is perfectly suited to the specific care setting.

All models can be flexibly adapted to a wide variety of room layouts and combined with suitable accessories to create a complete, functional interior design.

Easy to use

Immediate efficiency is achieved through intuitive operation, regardless of staff training status.

Buzzer quick-start button

and up to 27 further programmes of your choice

Direct execution of the most frequently used program, with no menu navigation or training required

Programs are selected instantly at the touch of a button, which means that workflows are streamlined and user errors are reduced.

Intuitive visualisation

thanks to the TFT plain-text display

Video tutorials

directly via the QR code on the machine's display

Conserves resources

Smart systems reduce water and energy consumption during operation without involving any extra work for staff.

ECO button

for saving drinking water and energy

Energy-saving washing-up system

by means of a separate flushing water supply

Rush-hour mode

increases throughput during periods of high workload

Hygiene & safety

Reproducible disinfection results and comprehensive process documentation ensure maximum safety in day-to-day use.

Three freely adjustable A0 values

for customisable disinfection intensity

Automatic system disinfection

to ensure regular system hygiene

Data loggers for process documentation

to ensure maximum transparency and traceability of all processes
