Product details

DISCHER PICCOLO

The little one with plenty of power

The DISCHER PICCOLO is a high-power, compact model for cleaning and disinfecting tableware used in healthcare settings.

Despite its compact size, the appliance impresses with its reliable results, ease of use and robust design, making it ideal for everyday use.

Thanks to its space-saving design, the PICCOLO can be used almost anywhere and is particularly suitable for confined spaces.

Easy to use

Hygienic power-on film with one-button operation

The LCD graphic display clearly shows all relevant operating parameters and assists the operator in day-to-day use

Hygiene & safety

Three freely adjustable A0 values for customisable disinfection intensity

Aqua-Dry drying

for hygienically safe and dry results without the need for manual finishing

Optional

automatic door opening

for low-contact operation without the need for manual opening using a handle

Efficiency & control

Rush-hour mode

for increased throughput at high capacity utilisation

Data loggers for process documentation

to ensure maximum transparency and traceability of all processes
